

What are the ten global measurements for HIV epidemic?

90

Strategic information collected on these indicators will show progress towards the 90-90-90 targets by UNAIDS:

- By 2020, 90% of all people living with HIV will have been diagnosed.
- By 2020, 90% of all people with diagnosed HIV infection will receive antiretroviral therapy.
- By 2020, 90% of all people on antiretroviral therapy will have viral suppression.
